Through your THOUGHTS, WORDS and FEELINGS you create not only your perceptions about the world, also affect your body and your health. The frequency of these three important elements are closely related. They must be coherent, equal in amplitude, have the same vibrational level to easily achieve the desired harmony in every area of your life.

To guide people and during the healing session, Robert Munck use Tachyons to "call the Energy" and "Visualize" the the next step to the person.

People come to a session to increase the ability of receiving real intuitives informations, harmonize, receive larger amounts of healing energy, or simply clarify their choices or understanding of a situation, allowing them to take good decisions in their life.
